

Dear Dental Practitioner:

We have enclosed the radiation safety manual guidance documents for dental offices. The guide can be used in the present form with the appropriate information placed in the spaces provided or may serve as a template for you to prepare your own guide.

The guide should be reviewed by all staff that operates the x-ray equipment and the necessary assignments made for the identification of staff that is responsible for activities related to personal dosimeters and darkroom operations.

If you have any questions, call Mark Bunge, Supervisor, X-ray Registration and Inspection Program, (608) 267-4784.
